OBJECTIVE

Continuously motivated to apply my knowledge in computer science to deliver efficient, scalable solutions aligned with organizational goals. Adaptable team player, capable of thriving in dynamic, technology-driven environments.

EDUCATION

Graphic Era Hill University, Dehradun

Bachelor of Technology; GPA: 8.2

2022 - 2026

St. Mary's Sr. Sec. School, Haridwar

Intermediate; Percentage: 78.8

2021 – 2022

SKILLS SUMMARY

- **Languages:** Python, SQL, C++, C, JavaScript, HTML, CSS
- **Frameworks:** Pandas, Numpy, Scikit-learn, Matplotlib, TensorFlow, React
- **Tools:** Excel, PowerPoint, MySQL
- **Platforms:** PyCharm, Jupyter Notebook, Visual Studio Code, IntelliJ IDEA
- **Data Analysis & Visualization:** Data Analysis & Visualization, Exploratory Data Analysis, Model Evaluation

WORK EXPERIENCE

SALESFORCE DEVELOPER INTERN | SMARTBRIDGE

May 2025 - July 2025

- Configured Salesforce org environments including users, profiles, roles, and permission sets to ensure secure and structured data access.
- Designed and managed standard and custom objects, relationships, and validation rules to model real-world business workflows on the Salesforce platform.
- Implemented backend logic using Apex classes and triggers, and built interactive user interfaces with Lightning Web Components (LWC).
- Worked within a guided Agile-style virtual internship framework, completing Trailhead modules and Superbadge tasks aligned with industry practices.

PROJECTS

Resume-Job Matcher

- Orchestrated an automated resume screening workflow that reduced recruiter shortlisting effort by 60%.
- Devised an NLP-driven matching algorithm that elevated resume–job relevance accuracy by 22%.
- Operationalized candidate ranking logic capable of evaluating 300+ resumes per day, increasing throughput.
- Synthesized personalized resume insights that enabled candidates to improve job-fit alignment by up to 30%.

Amazon Reviews Sentiment Analysis

- Aggregated 10,000+ Amazon customer reviews to extract sentiment-driven insights using advanced NLP techniques.
- Refined textual data via tokenization, lemmatization, and TF-IDF pipelines, boosting classification performance by 28%.
- Evaluated multiple predictive models, achieving 86% test accuracy with balanced precision and recall.
- Provisioned a real-time sentiment inference API paired with interactive dashboards, lowering manual review analysis workload by 35%.

Carbon Footprint Tracker

- Conceived a full-stack sustainability platform empowering 500+ users to monitor and manage daily carbon emissions.
- Stimulated user engagement by 25% through dynamic dashboards and real-time environmental metrics.
- Facilitated multi-format emission report exports and sharing, driving a 40% increase in report downloads.
