Education

Ajay Kumar Garg Engineering College, Ghaziabad

Bachelor of Technology in Computer Science

Oct 2021 – May 2025

CGPA : 7.5/10.0

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Project Management
- Software Methodology
- Database Management
- IOT
- Computer Architecture

Experience

Eureka Trips

Jan 2025 – Apr 2025

Software Developer Intern

- Developed and optimized the company's portal, improving load times by 25% and increasing engagement by 15%.
- Engineered a CRM using Google Sheets, Python, and Excel APIs, automating data workflows and saving 10+ hours weekly.
- Implemented version-controlled backups for safe deployment and rollback.

Eduhub, Google Winter Of Code

Jan 2024 – March 2024

UI & Front End Developer Intern

- Contributed to a 3-month national hackathon hosted by IIIT Kalyani, applying UI/UX best practices and responsive design to craft engaging user interfaces;
- Assisted in transforming accessibility scores by 18% and boosting average session duration by 10%.
- Recognized for strong design thinking, consistency, and attention to user experience.

Projects

JobZee | ReactJs , NodeJs, ExpressJs, MongoDB

- Implemented a full-stack Job Seeking Application with adaptive job listing and admin capabilities, including secure JWT-based role control.
- Automated CI/CD workflows using GitHub Actions, reducing deployment time by 30%.
- Boosted feature usage by 40% and trimmed application drop-off by 25% via real-time content control on the employer dashboard.

Sankatmochak Disaster Management System | Rest API, ReactJS, JWT Auth, NodeJs

- Led the development of a real-time disaster monitoring app during a 36-hour hackathon; lowered alert latency by 60% through efficient API handling and UI optimization.
- Integrated face detection and an emergency SOS system, processing real-time data from external APIs and demonstrating network protocol knowledge.
- Applied multithreaded/concurrent processing concepts and refined user interaction by 35% through advanced filtering and sorting. Achieved 60% latency reduction through optimized API workflows and concurrent handling of SOS events.

Gennie | Python, Fast API, OpenCV, Hugging Face, MongoDB

- Developed an AI chatbot that analyzed 1,000+ user profiles to suggest size-accurate outfits, reducing size-related returns by 42%.
- Used NLP and logic-based rules to resolve color and fit issues, lowering return/exchange requests by 35% across 3 platforms. Processed 5,000+ shopping records to deliver behavior-driven suggestions, increasing CTR on recommendations by 28%.

Technical Skills

Languages: C/C++, JavaScript, TypeScript, Python, SQL

Tools & Technologies: Git, GitHub, VS Code, Google Cloud Platform, Selenium, Excel API, Machine Learning

Frontend: HTML, CSS, JavaScript, React.js, Redux, React Router, Next.js , Tailwind CSS, Material UI

Backend & APIs: REST APIs, Node.js, Express.js, MongoDB, Mongoose, JWT, Firebase, JWT Authentication

Leadership / Extracurricular

- Finalist, Google Cloud GenAI Hackathon — Leveraged GenAI APIs to build AI-Clothing Recommendation System.
- Under Top 5, Technothon CHEMKRITI NIT Durgapur — R&D of Seaweed as Sustainable Biomass
- Collaborated in a cross-functional team to design a user-friendly EdTech automation system, showcased at NSUT DTU
