EDUCATION

- **Netaji Subhash Engineering College** Delhi, India
Bachelor of Technology - Computer Science; GPA: 8.00 *July 2021 - June 2025*
- **Dav Public School, Pushpanjali** Delhi, India
XII Class, CBSE; 95.6% *2020-2021*

EXPERIENCE

- **JobHai, Infoedge India Pvt Ltd** Noida, India
Software Developer Intern *Jan 2025 - July 2025*
 - **Enhanced Job Description:** Implemented a one-click “Enhanced Job Description” feature that auto-generated richer content from form inputs, improving content quality and engagement.
Increased job description page impressions by 20%, improved SEO rankings and click-through rates, and drove a 24% increase in average weekly registrations — all without adding friction to the recruiter workflow.
 - **Credit-Based Bulk Download Functionality of Leads:** Designed and launched a credit-based bulk download system for candidate profiles, enabling recruiters to download leads individually or in bulk.
Introduced a dynamic monetization model with real-time credit validation, significantly boosting platform revenue.
Used asynchronous processing and secure download links to eliminate performance bottlenecks and enhanced UX for large dataset downloads. The feature drove 2 million credits in consumption post-launch.
 - **Meta Pixel Event Integration:** Integrated Meta Pixel event tracking to monitor job seeker interactions across the platform, including job views, applications, and key funnel events. Captured behavioral data to build rich user audiences and enable personalized retargeting campaign.
- **Wells Fargo** Chennai, India
Software Developer Intern *May 2024 - July 2024*
 - **Notify: Network Path Tracing:** Built an application enabling network administrators to visualize topology and run diagnostics. Real-time detection of faulty devices and paths improved network reliability.
Interactive monitoring and troubleshooting features contributed to a 10% decrease in issue resolution time.
- **ZenFi Technologies Pvt Ltd** Remote
Full Stack Developer *Feb 2024 - May 2024*
 - **VouchrIt: Purchase Voucher Automation:** Developed a middleware for Tally software to automate the process of entries, enhancing efficiency and accuracy in transaction recording.
Created an algorithm to extract relevant information from invoices and convert them into appropriate key-value pairs, facilitating seamless integration with Tally.
Handled various invoice formats, ensuring consistent and reliable data extraction and processing across different document types.

PROJECTS

- **IOT Device Classification and Anti-spoofing:** Simulated a diverse IoT device network with a multithreaded server for data generation, using Tshark and Scapy for packet analysis and network sniffing, generating over 1.6L rows.
Built a neural network with TensorFlow to predict devices using multidevice data and strengthen IP spoofing detection.
Technology Used: Tensorflow, Scapy, Numpy, Pandas, Socket, Docker
- **Blockchain Based Loyalty Reward Program:** Launched an ERC20 token FLC to incentivize customer engagement, allowing users to earn tokens through tasks and redeem them for coupons or as a payment method.
Introduced batch processing to minimize gas fees and integrated a gamified hybrid payment system, enabling seamless use of FLC tokens alongside traditional methods for an enhanced shopping experience.
Technology Used: Ethereum, Solidity, Ethers.js, Hardhat, Polygon, Re-act.js, Express.js, Firebase

SKILLS SUMMARY

- **Languages:** Python, JavaScript, TypeScript, C++
- **Front End:** React.js, Next.js, Tailwind, React Native
- **Back End:** Node.js, Express.js, Flask, Django, tRPC
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud:** AWS, GCP
- **Blockchain:** Solidity, Ethers.js, Web3.js, Hardhat, Polygon
- **Tools:** Git, Docker, Kubernetes, Figma, VS Code

ACHIEVEMENTS

- Advanced to the pre-final round of the Flipkart Grid Challenge, outperforming over 400,000 participants
- Achieved a 3-star rating on Codechef (Max Rating 1633).
