EXPERIENCE

Tredence Inc.

Bangalore, India

Software Engineer

July 2025 – Present

- Built scalable data processing pipelines using Apache Spark, Hadoop, and Hive to support ETL workloads.
- Collaborated on production data pipelines deployed on AWS EMR, ensuring fault-tolerant and efficient execution.
- Leveraged Scala, Spark SQL, and S3 for analytics and reporting use cases in a cloud-native environment.
- Automated large-scale data ingestion tasks using Airflow and PySpark, reducing manual effort by 40%.

Neo Tech

Remote, India

Software Developer Intern

Jan 2025-Mar 2025

- Monitored infrastructure reliability and service uptime using Prometheus metrics and Grafana dashboards.
- Designed and deployed a real-time alerting and logging pipeline with AWS Lambda, CloudWatch, and S3, reducing mean time to detect (MTTD) by 30%.
- Collaborated with developers to integrate CI/CD pipelines and enforce deployment reliability across production.

Race AI (Startup)

Remote, India

Software Developer Intern

June 2024-Nov 2024

- Developed high-performance backend services using Spring Boot and Java, improving scalability by 30%.
- Integrated RESTful APIs and optimized PostgreSQL queries, reducing execution time by 25%.
- Designed modular microservices architecture for scalable backend communication.
- Built Kafka-based event-driven architecture to support high-throughput async operations.

PROJECTS

Real-Time Retail Analytics Platform | Java, Spring Boot, Apache Kafka, Spark Streaming, AWS, Docker, Grafana

- Built real-time sales analytics backend to process POS data and deliver actionable insights.
- Integrated Apache Kafka and Spark Streaming to ingest and analyze data with sub-second latency.
- Deployed microservices to AWS ECS using Docker, with monitoring via Prometheus and Grafana.
- Delivered business dashboards to track inventory turnover, sales trends, and promotion effectiveness.

Logistics Fleet Optimization System | Java, Spring Boot, Redis, PostgreSQL, Kafka, OpenStreetMap API

- Designed and deployed a scalable system to optimize delivery routes based on real-time traffic and order volume. Implemented Kafka for real-time dispatch updates and Redis for fast vehicle-location matching.
- Reduced average delivery times by 18% and enabled surge load handling during peak hours.

EDUCATION

Motilal Nehru National Institute of Technology

Prayagraj, India

Bachelor of Technology

2021 – 2025

Indian Institute of Technology Madras

Madras, India

B.S Data Science and Programming

SKILLS

Technical: Java, Spring Boot, Python, JavaScript, TypeScript, C++

Cloud & DevOps: AWS (S3, Lambda, EC2, EMR), Docker, Kubernetes, Kafka, CI/CD

CERTIFICATIONS

- Master Spring Boot 3 and Spring 6 for Beginners-Udemy([Link](#))
- Google Professional Data Analytics– Coursera([Link](#))
- Achieved Global Rank 994 in LeetCode Biweekly Contest(1800+ problems solved)
- McKinsey Forward Program–Global Learner Completed McKinsey's global program focused on structured thinking, collaboration, and digital fluency.([Link](#))
